Inside Cover

Production for Week Ended:
September 22, 1984

Contains Supplementary Data

Preface

The WCP

The *Weekly Coal Production* (WCP) provides weekly production estimates of U.S. coal by rank, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This report is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data col-

lection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other reports that may be of interest are the quarterly *Coal Distribution Report* and the *Quarterly Coal Report*.

General information about this report may be obtained from Robert Harris, Chief, Data Systems Branch (202/252-2982). For specific information regarding the preparation and contents of this publication, contact Ann Ducca (202/252-6875) or Judith Wood (202/252-5228).

Highlights

Production of bituminous coal and lignite established a new record high in the week ended September 22, 1984 of 20,149,000 short tons, as estimated by the Energy Information Administration. This was an increase of 356,000 short tons or 1.8 percent from production in the previous week. This high surpassed the previous record high of 19,900,000 short tons as reported for the week ended August 25, 1984. Bituminous coal and lignite production from January 1 through September 22, 1984 totaled 673,022,000 short tons, 19.8 percent

above production in the same period in 1983.

Production of Pennsylvania anthracite in the week ended September 22, 1984, as estimated by the Energy Information Administration, was 102,000 short tons, the same as production in the previous week. Production in the corresponding week of 1983 was 87,000 short tons. Anthracite production from January 1 through September 22, 1984 totaled 3,079,000 short tons, 8.6 percent above production in the same period in 1983.

IMPORTANT NOTICE

As required by Government regulation, EIA is conducting its annual publications mailing list review. If you are on the EIA mailing list, we will soon be sending you an important postcard. You will have to return it to us to stay on the EIA mailing list. If you have not received the postcard by **AUGUST 3, 1984**, please contact the National Energy Information Center at 202-252-8800.

NOTE: This notice does not apply to subscriptions which have been purchased from the Government Printing Office (GPO).
